REC Contractors, Inc.

Distinctive designs. Incomparable service.

The centerpiece of our shop is a large envelope Thermwood 5-axis CNC. We chose Thermwood because their innovation and dedication to improving the industry so closely matches our own business model. This baby was born with dual 60 x 144 tables, 36" z-axis, rotary playback, and a whole lot of other crap I'm too tired to type. This beast will bring a smile to even the grumpiest old cabinet maker's face.

Our Package is Unique!

With this machine's incredible versatility, we've been able to keep up with the needs of our customers. It provided the added capacity and capabilities we craved as well as opened us up to markets that were desperate for our superior customer service. So it's simple. We need your money. You need a reliable, well equipped shop. The decision makes itself!
